This is a free online image maker that allows you to add substantially customized text to images. It operates on HTML5 canvas, so create your images instantly on your device. Mostly, people use generators to add text captions to create memes, so technically it's more of a meme captioner than a meme maker. However, you can also upload your images as templates. How do I customize my MM? You can move and resize text boxes by dragging them around. If you are on a mobile device, you may first check enable drag/drop in the More Options section. You can customize the font color and outline color next to where you type your text. You can further customize the fonts in the More Options section, as well as add additional text boxes. Imgflip supports all web fonts and Windows/Mac fonts including Bold and Italic, if they are installed on your device. Any other fonts on your device can also be used. Note that Android and other mobile operating systems may support fewer fonts unless you install them yourself. You can insert popular or custom stickers and other images including scumbag hats, deal with those sunglasses, speech bubbles, and more. Opacity and resizing are supported. You can rotate, flip, and product any template you upload. You can draw, outline, or line on your meme using the panel just above the meme preview image. You can create meme chains of multiple vertical stacking images by adding new images with the current image set below. Can I use more generators than M.M.? yes! Meme Generator is a flexible tool for many purposes. By uploading custom images and using all customizations, you can design many creative tasks including posters, banners, ads, and other custom graphics. Why is there imgflip.com watermark on my mam? Imgflip water sign helps other people find out where meme was created so they can memes too! However, if you really like, you can remove our watermark from all the images you create, as well as remove ads and supercharge abilities to create your own image, using Imgflip Pro or Imgflip Pro Basic.
